**Re: Intel Corporation, Aloha and Ronler Acres Campuses, ACDP 34-2681-ST-01
Calendar Year 2022 Annual Report [Revised]**

Dear Ms. Jacobs:

In accordance with the requirements set forth in Oregon Department of Environmental Quality (ODEQ) Permit ACDP 34-2681-ST-01 (Dated 1/22/16) Condition 77.b., Intel is submitting three (3) copies of this annual report.

During calendar year 2022, there were two bypass events reported to ODEQ: one reported on July 8, 2022 for an event that occurred on June 25, 2022 due to a malfunction and subsequent shutdown of an RCTO; another reported on December 24, 2022 for an event that occurred on December 16, 2022 due to operator error in isolating an online unit during maintenance operations on an already down unit.

There were three instances of deviations from permit condition 45, reported to ODEQ on March 4th 2022, July 26, 2022, and September 16, 2022: two of which were maintenance checks and readiness testing (M&R testing) outside the daytime hours of operation of 8 am and 6 pm; and one due to extended operation following a PGE outage.

There was one instance of deviation from permit conditions 39, 40, and 72 that began on July 7, 2022, discovered on September 9, 2022 and was reported to ODEQ on September 23, 2022. This instance was due to loss of pH monitoring capabilities on an acid scrubber due to operator error.

- 77.b.ii.: The emission fee report
- 77.b.iii.: A summary of the Excess Emissions and Upset log
- 77.b.iv.: The annual certification that the risk management plan is being properly implemented
- 77.b.v.: The type and amount of fuel combusted
- NOTES:
- The amount of fuel combusted was updated on 2/29/24 to correct an error in the reported Natural Gas (NG) usage for reporting year 2022. NG usage was monitored for a NG supply point as required by the permit. However, a code error in the NG usage calculation led to an underreporting of NG for CY2022 (the error did not affect prior years). The code error only affected the NG fuel use calculations for supply to one of the fabs at Ronler Acres and did not affect actual site emissions.
- 77.b.vi.: The calculated 12-month rolling emission rates for PM, PM₁₀, PM_{2.5}, SO₂, CO, NO_x, VOC, GHG, Fluorides, combined HAPs and individual HAPs
- NOTES:
- Reporting for individual HAPs is only required for pollutants with emission rates of 0.1 or more tons/yr.
 - The GHG emissions report was submitted on March 29, 2023, as per OAR 340, Division 215 and updated on August 24, 2023 per 3rd party verification request.
 - The GHG emissions for CY2022 were updated per OAR 340, Division 215 to incorporate an update to a 2022 end of year gas tank inventory and minor updates to GHG emission calculation inputs, including tool downtime. The GHG emissions report was revised on May 24th, 2024 to incorporate these updates.
- 77.b/vii.: Revisions of the pollutant capture efficiency function used for compliance emission calculations in condition 60.
- 77.b.viii.: A summary of the physical changes, additions and/or process modifications as well as the pollution prevention project(s) performed to offset emission increases associated with these changes/modifications, pre-approved pursuant to Condition 16. In addition, the permittee must identify and summarize any change(s) with the associated emission increase of five (5) or more tons of VOC or one (1) or more tons of any HAP on a yearly basis.
- 77.b.ix.: Summary of complaints relating to air quality received by permittee during the year.
- 77.b.x.: List of major maintenance performed on pollution control equipment.
- 77.b.xi.: There are no applicable Subpart Dc specific reporting requirements for affected facilities that are exclusively natural gas fired.

77.b.ii.: Emission fee report:

Attachment A to this annual report includes Form F1101 as the emission fee report.

77.b.iii.: Summary of the Excess Emissions and Upset log:

There were no excess emissions or upset events in calendar year 2022.

77.b.iv.: Annual certification that the risk management plan (RMP) is being properly implemented:

The Ronler Acres campus has an RMP that was last updated in May of 2022. The RMP is current and is implemented as required. The Aloha campus does not store regulated substances in quantities which exceed the RMP applicability threshold quantities, and therefore does not have an RMP.

77.b.v.: The type and amount of fuel combusted:

The Ronler Acres and Aloha campuses only combust natural gas and diesel fuel. The diesel fuel is fired within the emergency generators and fire pumps, while natural gas is fired in boilers, RCTOs, heaters, and Point of Use (POU) abatement devices. The quantity of these fuels combusted in 2022 are summarized below.

- Diesel Fuel Combusted
 - Aloha: 1,806 gallons
 - Ronler Acres: 44,726 gallons
 - Total: 46,532 gallons
- Natural Gas Combusted
 - Aloha: 182 MMscf
 - Ronler Acres: 1,658 MMscf
 - Total: 1,840 MMscf

77.b.vi.: Calculated 12-month rolling emissions:

Attachment B to this annual report includes the calculated 12-month rolling emission rates for PM, PM₁₀, PM_{2.5}, SO₂, CO, NO_x, VOC, GHG, Fluorides, combined HAPs, and individual HAPs with annual emissions of 0.1 or more tons/yr. VOC emissions include both controlled and uncontrolled VOC emissions from the site.

77.b.vii.: Revisions of the pollutant capture efficiency function used for compliance emission calculations in condition 60:

No revisions were made to pollutant capture efficiencies used for compliance emission calculations in condition 60.

77.b.viii.: Summary of physical changes pursuant to Condition 16:

During calendar year 2022, there were no physical changes, additions and/or process modifications or associated pollution prevention projects performed to offset emission increases in accordance with Permit ACDP 34-2681-ST-01 Condition 16 regarding Operational Flexibility.

77.b.ix.: Summary of complaints:

During calendar year 2022, there were no formal complaints or inquiries.

77.b.x.: List of major maintenance performed on pollution control equipment:

Attachment C to this annual report includes a list of major maintenance performed on the RCTOs, scrubbers, WESPs at the Ronler Acres and Aloha campuses. All maintenance records (major and minor) are maintained onsite within the Maximo system and available for inspection upon request.

77.b.xi.: NSPS Subpart Dc reporting requirements:

Intel continues to fire natural gas exclusively in all boilers at the Ronler Acres and Aloha campuses. Therefore, there are no applicable Subpart Dc reporting requirements.

Statement of Certification (as required by Permit Condition 74):

Based on information and belief formed after reasonable inquiry, the statements and information in this document and any attachments are true, accurate and complete. I also certify that all statements made concerning compliance, which are based on monitoring required by the permit but not required to be submitted to DEQ, are true, accurate and complete based on information and belief formed after reasonable inquiry.
